

Crush - Where Flowers Grow

dream pop SINGLE

RD: FEBRUARY 03

digital

from upcoming ALBUM *Past Perfect* (MAY 2023)

Crush - Where Flowers Grow

filmed and directed by Gabriel Hyden

With their comeback single, Crush encourage stuck minds to acknowledge the phantom pain of restlessness and follow the impulse for movement and action in togetherness, with energetic baby steps. Stop where you are seems daunting, but there is always a new beginning, a springtime, *Where Flowers Grow*. Crush's warmly anticipated new dream-pop long player *Past Perfect* will be released in May 2023.

Following their debut album [Sugarcoat](#) (2018) and their EP [Sundown](#) (2020), *Where Floweres Grow* is the first herald of the new album.
